RE: Epoxy Approval – ULTRABOND ASF-2000

The Minnesota Department of Transportation (MnDOT) has reviewed the documentation you submitted for approval of ULTRABOND ASF-2000. This products have been shown to meet the requirements of ASTM C881 and have been added to the approved/qualified products list under the category *Epoxy Bonding Agents – Used to bond fresh concrete to old concrete*.

ULTRABOND ASF-2000 was also evaluated by the MnDOT Office of Environmental Stewardship Hazardous Evaluation Process (HEP). The product meets the requirements.

Please also note that it is the manufacturer's responsibility to immediately notify MnDOT if the chemical formulation of any product is changed or modified, or if the product is no longer being produced.

The approved epoxy products are located on the MnDOT Concrete Engineering Unit web site at:

<http://www.dot.state.mn.us/products/concrete/epoxies.html>

Please feel free to contact me [Jacob.Gave@state.mn.us](mailto:Jacob.Gave@state.mn.us) with any questions and/or comments.

Sincerely,

Jacob Gave, PE  
Assistant Concrete Engineer
