Re: *PEB 5838: ULTRABOND 1300-FG(2025)*

Dear Mr. Thomas:

The updated two-component, fast-setting adhesive system was submitted to the Product Evaluation Board (PEB) of the Alabama Department of Transportation for approval consideration. Based on the review of the product application, associated documentation, and/or completed testing, the PEB concluded that the product met the initial requirements for placement on the Department's *Qualified Products Lists*.

The referenced product will be placed on our Department's *List II-15, Concrete Anchoring Systems*, under the subheading, *'Injection Type'*, in the department's Materials, Sources, and Devices with Special Acceptance Requirements (MSDSAR) Manual. The product will remain on the list if it continues to meet the Department's current specifications and performs satisfactorily under field conditions.

As a requirement to remain on a list you must provide only approved products to the Department projects and promptly notify us through formal correspondence (i.e. company letter) of a company, product, and/or address name change, any changes in production of the product or alterations that may change the product chemically or physically. This will allow our listing to stay current and will prevent your product from being removed from the list due to out-of-date information or failure to adhere to the terms outlined above. In addition, we reserve the right to request samples for testing at our convenience and/or require the submittal of current test data from a certified/qualified testing laboratory for our review should the product fail to perform satisfactorily or if changes are made to the product after placement on our list.

If you have any questions, please contact Ms. Kidada Dixon or Mr. Earnest Colvin at (334) 353-6940.

Sincerely,

George H. Conner, P.E.  
Chairman, Product Evaluation Board
