Section 516: Concrete Pavement Patching

516.2(k) Anchor Material

Last Revised: 5/17/2023

See [Standard Drawing RC-26M \(Publication 72M\)](#)

Note: Adhesive anchors are not to be used for permanent installations which have the anchor in tension due to external loading regardless of whether the anchor is in a horizontal or vertical position. External loading can be from moment, moment and shear or direct tension to cause tension in the anchor. Tension due to a torqued bolt is not an external load.

Starting in Pub 408, 2020 Initial Edition (April 10, 2020), the Anchor Material section was moved to Section 501.2(p). Anchor material was listed in Section 516.2(k) up to and including Pub 408, 2016 Change No. 7 (October 4, 2019).
