Re: CRACKBOND LR-321

Renee Thomas
Sr. Engineer & DOT Manager
Adhesives Technology Corp.
450 E. Copans Rd.,
Pompano Beach, FL 33064

Dear Ms. Thomas,

CRACKBOND LR-321, manufactured by Adhesives Technology Corp., has been evaluated and passed The Virginia Department of Transportation's requirements for polymers for sealing cracks in hydraulic cement concrete, Section 252 in the Road and Bridge Specifications book. This product will be added to the Materials Division's approved List 28, "Polymers for Sealing Cracks in Hydraulic Cement Concrete" as an epoxy type polymer. This letter will serve as proof of approval until approved list 28 can be updated. In order for CRACKBOND LR-321 to remain approved, Adhesives Technology Corp. must submit a notarized letter of certification by each December for the following year, stating that no changes have been made in the formulation of CRACKBOND LR-321 since it was originally evaluated.

If I can be of further assistance, please call me at (804) 328-3135.

Sincerely,

A handwritten signature in cursive script that reads "K. K. Williams".

Keith Williams
Engineer I
