Pompano Beach, FL 33064

Subject: ULTRABOND HS-1CC

Mr. Dodier,

The Maine Department of Transportation's Concrete and Bridge Items Product Evaluation Committee has completed its review of the subject product.

This product meets the requirements of AASHTO M235 (ASTM C881) Type IV, Grade 3, Class B & C and will be added to our Qualified Products List (QPL)

Please note that once this is placed on the Qualified Products List it is not considered "Qualified for Use" but rather, "Prequalified for Use" meaning it has undergone preliminary review for compliance with MAINEDOT and AASHTO specifications. Final approval rests with the Designer, Project Manager, and Resident to determine if a product best suits the need of a project.

A friendly reminder: all products added to our QPL require recertification five years from the initial date of prequalification and every five years thereafter to remain on the QPL

Thank you for your interest in doing business with the Maine Department of Transportation.

Sincerely,

A handwritten signature in cursive script that reads "Dawn Bickford".
