

PROPEL FORWARD >>>

with EPO-TEK® 353NDP (Built on the pioneering 353ND)

Engineered for Reliability.
Trusted for Performance.

EPO-TEK® A Trusted Product Brand since 1966

Unlock Next-Level Reliability with Our Advanced Adhesive Solutions

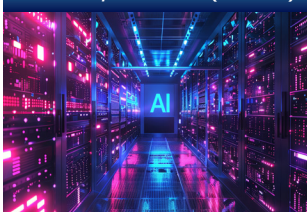

- **Proven 2000-Hour Reliability at 85°C/85% RH** – Ready to support 800G and 1.6T high-density systems.
- **Ultra-Low Outgassing** – Passed NASA Low-Outgassing ASTM E595.
- **Low-Temperature Curing** – Ideal for sensitive optoelectronic components without compromising bond strength.
- **Low Viscosity Formula** – Superior wicking and wetting for precision application in miniaturized assemblies.
- **High Die Shear Strength** – Ensures durable, reliable bonds for advanced network infrastructure.

Prepare for the next data revolution.
