

CONVERGENT

A Division of Adhesives Technology Corp.

Polishing System

Since 2000, Convergent has been at the forefront of the polished concrete industry. As the original manufacturer of lithium-silicate densifiers—and the first to introduce a sealer engineered specifically for polished concrete—we set the standard others follow. Today, Convergent continues to lead with high-performance chemistries that professional polishers trust for consistent, dependable results.

Pentra-Sil® (244+)
VOC Compliant Lithium
Hardener, Densifier & Sealer

Originally formulated for protection of exterior concrete against salt damage, over time, this unique product has been adopted by demanding concrete polishers for its unrivaled performance when polishing, maximum hardening and for stain protection when combined with Pentra-Finish™ (HG).

—or—

Pentra-Sil® (IH)
Polished Concrete Densifier
& Hardener

Pentra-Sil® (IH) is an easy-to-use lithium densifier formulated for concrete polishing. Applied during the honing stage, it hardens the substrate, improves polishing efficiency, and enhances the final finish without skinning, discoloration, or white blemishes, while remaining VOC compliant.

Pentra-Finish™ (HG)
High-Gloss, Stain & Wear
Protection Sealer

Pentra-Finish™ (HG) is a high-gloss lithium sealer that provides superior stain and wear protection for polished concrete, terrazzo, masonry, and other cementitious surfaces. It forms a durable microfilm that resists peeling, flaking, bubbling, abrasion, and stains, delivering a beautifully protected floor in commercial and industrial environments.
