

EP100-SEAL HM

LOW-VISCOSITY, HIGH MODULUS, LOW
SURFACE TENSION, 100% SOLIDS EPOXY

HIGH-MODULUS FORMULATION OF EP100-SEAL

EP100-SEAL HM is the high-modulus formulation of our EP100-SEAL, a high penetrating, two component epoxy healer sealer. EP100-SEAL HM is designed to seal cracks against moisture and chloride intrusion prolonging the life of concrete.

Features & Advantages

ASTM C881 (Type I Grade 1)	Low viscosity
VOC compliant (0 g/L)	High tensile strength providing for superior retention of aggregates
Excellent bond strength	Solvent-free
Moisture insensitive	Low odor
High early strength	High modulus
Easy to mix - 2:1 ratio	Designed for automated pump or hand mix application
100% solids	

EP100-SEAL HM is available in 3, 15, 165, and 750 gallon kits.

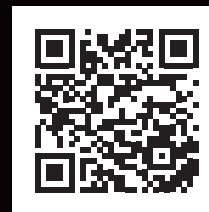

Tined: 1 gallon/60-80 ft²
Smooth: 1 gallon/100-150 ft²

(\$2.90 per yd²)

(100-150 cP - ASTM C881)
