

EPX50-OVERLAY

MOISTURE-INSENSITIVE, LOW-MODULUS
EPOXY-URETHANE CO-POLYMER OVERLAY RESIN

FOR BONDING SKID-RESISTANT OVERLAYS TO BRIDGES, ELEVATED SLABS, AND PCCP

EPX50-OVERLAY is a moisture-insensitive, low-modulus epoxy-urethane co-polymer overlay resin, offering longer life cycles than traditional epoxy polymer resins. **EPX50-OVERLAY** provides a waterproof, chloride impervious overlay system that is designed for bonding skid-resistant overlays to bridges, elevated slabs and PCCP. In addition to High Friction Surface Treatments, it is also excellent as a binder in epoxy repair mortars used for patching concrete.

Features & Advantages

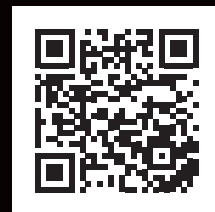

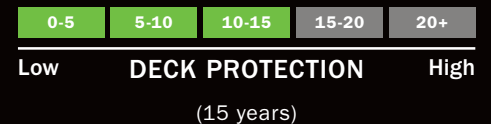

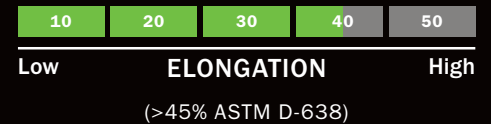

100% solids, No VOCs	1/4" - 3/8" two-layer polymer overlay
Chemical resistant and waterproof	Rapid cure times
Designed to protect bridge decks for 10-15 years	High early strength, high bond strength
Provides high skid resistant surface
