INSTRUCTIONS FOR USE:

- 1) By weight or volume accurately mix 2 parts Isocyanate to 1 part Polyol.
- 2) Two components should be carefully measured in metal, plastic, or glass containers. Avoid using paper cups and wooden stirrers.
- 3) Mixed material may be degassed at 28-29 inches of mercury to remove air and ensure bubble free castings. Containers should be large enough to allow frothing.
- 4) When pouring for cast parts pour in steady stream in one spot that avoids overlapping or trapping air. Parts may be preheated to improve flow.
- 5) Full Cure:

25°C 7 days 80°C 16 hours

f 401.946.5526

STORAGE, HANDLING AND SAFETY:

Store both components at 75-85°F in original containers. If the containers are opened and the contents partially used, the material left in the container should be blanketed with dry nitrogen before sealing. The products are moisture sensitive. Carefully read Material Safety Data Sheets before using.
